

Nicolás Correa

Full Stack Developer | DevOps & Platform Engineering

Mendoza, Argentina | +54 9 261 258 2481 | ncorrea13@proton.me

ncorrea.com.ar | linkedin.com/in/nicolas-correa-serrat | github.com/ncorrea-13

Advanced Systems Engineering student with practical experience in full stack development, REST APIs, Python automation, Oracle APEX, PL/SQL, and Linux infrastructure. Experienced in building production services, integrating internal and external APIs, and automating operational workflows. Interested in backend development, DevOps, and platform engineering.

Work Experience

Software Developer | Aguas y Saneamiento Mendoza (AYSAM) | *November 2025 - Present*

- Build full stack solutions within the Oracle ecosystem using PL/SQL and Oracle APEX.
- Design and implement secure REST APIs for production environments, including modules for project tracking and server to server communication.
- Consume and integrate REST and GraphQL APIs from internal and external systems.
- Develop Python microservices and automation scripts to connect industrial systems and reduce manual work in accounting and reconciliation workflows.

IT Intern | Caja Forense de Mendoza | *September 2025 - November 2025*

- Supported IT operations in a systems office, focusing on server administration and virtualized infrastructure using Proxmox VE.
- Maintained and monitored existing virtual machines, ensuring stable operation across the infrastructure.
- Managed automated backup processes to protect systems and data.

Reviewer & Contributor | Outlier | *June 2025 - September 2025*

- Contributed to global AI projects involving technical review, prompt writing, code analysis, and model evaluation.
- Evaluated AI-generated responses for accuracy, clarity, reasoning, and technical correctness.
- Gave structured feedback to help improve language models on programming, debugging, and problem solving tasks.
- Reviewed responses related to software development and debugging, assessing the quality of proposed technical solutions.

Web Software Developer | Freelancer | *December 2024 - March 2025*

- Built and delivered full stack web applications for multiple clients using Node.js, TypeScript, and JavaScript while collaborating through Git workflows and agile planning tools.

Backend Developer | Qaizen | *February 2023 - June 2023*

- Developed the core backend logic for a web application focused on bullying prevention and reporting, which reached production and real-world use.
- Designed, implemented, and managed the database architecture with PostgreSQL, PHP, and JavaScript.

Skills

- **Backend:** TypeScript, JavaScript, Node.js, npm, pnpm, NestJS, Express.js, Python, FastAPI, Java, Spring Boot, Spring Security, Gradle, Maven, Bash, PL/SQL
- **Frontend:** JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS, Bootstrap, Oracle APEX
- **Databases:** PostgreSQL, MySQL, Oracle, SQL Server, Supabase, Prisma
- **Systems and Infrastructure:** Linux (RHEL, Debian, Ubuntu Server, Devuan), VMware, Proxmox, VirtualBox, Networking, WireGuard, Proxies, Nmap, Burp Suite, Tailscale, Cloudflare Tunnel, QEMU
- **DevOps and Cloud:** Docker, Podman, Vercel, CI/CD, GitHub Actions
- **AI Assisted Development:** Claude Code, OpenCode, GitHub Copilot
- **Tools:** Git, GitHub, Postman, VS Code

Soft Skills

- Comfortable working with nontechnical teams and explaining technical decisions in plain language
- Quick to learn new tools and technology stacks independently
- Strong debugging and decision making skills in ambiguous situations

Personal Projects

Pethood | Final Degree Thesis (Team Project) | *March 2026 - Present*

- Lead backend development of a REST API using Express, TypeScript, PostgreSQL, and Prisma, including database schema design and core business logic.
- Set up an automated CI pipeline with GitHub Actions covering linting, type checking, builds, and automated tests on every push and pull request.
- Contribute to a companion mobile app built with Expo and NativeWind, consuming the same API through a shared monorepo.

Bw-tui | Personal

- Built a terminal user interface for the Bitwarden CLI with two implementations: a full Rust version and a lightweight Bash version.
- Published under the MIT License. Current release: v0.2.3.

Homelab | Personal | *February 2026 - Present*

- Built self-hosted infrastructure using isolated Podman pods managed as independent systemd user services.
- Designed the environment with no ports exposed to the public internet.
- Implemented secret management with Podman secrets and automated storage health alerts.
- Added a Samsung Galaxy S9+ running Termux as an independent monitoring node to maintain alerting if the main infrastructure becomes unavailable.

Security Laboratory (LabAuSegTic) | Universidad Tecnológica Nacional (UTN - FRM) | *March 2025 - November 2025*

- Performed controlled security testing of Linux servers and web platforms using XSS, SQL injection, LFI, and CSRF techniques.
- Wrote Python scripts to automate reconnaissance and vulnerability testing tasks during laboratory exercises.

Education

Systems Engineer | Universidad Tecnológica Nacional (UTN - FRM) | *March 2022 - Present*

- Final year student focused on software development, databases, and systems design.
- Completed 37 of 42 courses and currently in the 10th semester.

English Language Certification | Instituto Cultural de Mendoza (ICM) | *March 2018 - December 2024*

- Certified by the Dirección General de Escuelas (DGE), Mendoza, Argentina.

Full-Stack Java Web Developer | Egg Education | *November 2021 - October 2022 (500 hours)*

- Scholarship granted by Universidad Nacional de Cuyo (UNCuyo)
- Intensive training in frontend and backend web development using modern technologies.
